PRIIP Manufacturer Name:	Allied Irish Banks, p.l.c. ("AIB"), part of AIB Group
Website for PRIIP Manufacturer:	https://aib.ie/fxcentre
Contact number for PRIIP Manufacturer:	Call +353 1 772 4005 for more information
Competent Authority:	The Central Bank of Ireland is responsible for supervising AIB in relation to this Key Information Document
Date of production of the Key Information Document:	24th February 2023

You are about to purchase a product that is not simple and may be difficult to understand.

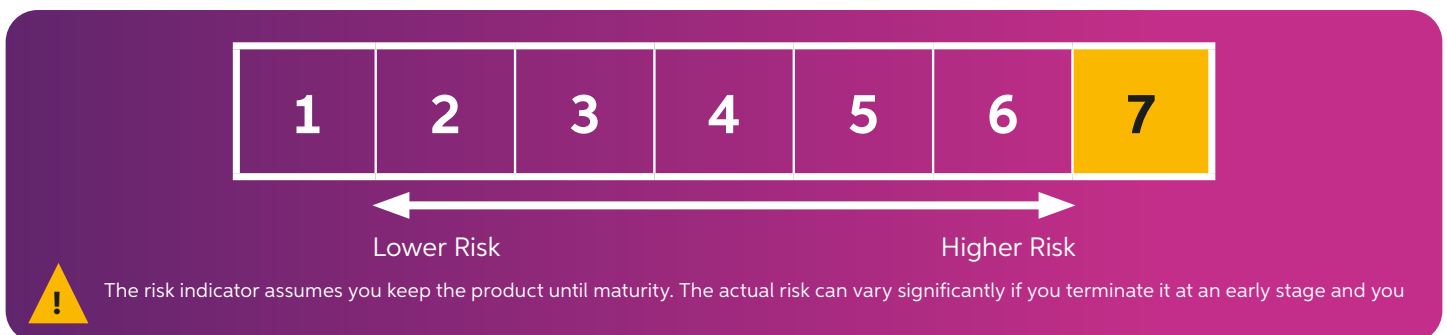

What is this product?

Type	Over the Counter Derivative (OTC) – FX Option
Term	An FX Option can be booked in all major currencies with a final maturity date of up to typically one year. The expiry date of the FX Option will be agreed with AIB before you enter into the transaction. It is a bilateral agreement that cannot ordinarily be terminated unilaterally by either you or AIB.
Objectives	<p>An FX Option is a hedging solution which provides protection against adverse foreign exchange rate movements above pre-agreed levels, ending on the expiry date. The objective of this product is to provide you with a worst-case foreign exchange rate for a future foreign exchange transaction.</p> <p>In exchange for the purchase of the FX Option, you will pay an upfront, non-refundable premium to AIB at the time of deal execution.</p> <p>The product gives you the right but not the obligation to exchange one currency for another at a defined worst case exchange rate (the "strike rate") on a fixed future date (the 'expiry date').</p> <p>If, at the expiry date, the FX spot rate is worse than the strike rate, you have the right to sell one currency for another at the strike rate for the notional amount agreed.</p> <p>If, at the expiry date, the FX spot rate is better than the strike rate, then you may choose to sell one currency for another at the prevailing FX spot rate, for the notional amount agreed, as you have no obligation to use your FX Option.</p>
Intended Retail Investor	<p>This product is intended for retail businesses wishing to mitigate the exchange rate risk associated with future currency exposures and who are seeking to hedge future currency exposures, such as future import or export transactions.</p> <p>The FX Option is appropriate if the client is able to pay an upfront premium to hedge known exposures and manage downside FX risk but also where they want to express a market view that spot rates will trade in their favour. The transaction shall not be used for speculative purposes. As such you are expected to hold the product to maturity to match your exposure. Please note that AIB does not provide investment or other advice in the sale of this product.</p>

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class.

Key Information Document

If you cannot fulfil your contract, you may not be able to terminate it easily before maturity or you may have to end your product at a price that significantly impacts on the performance of your product. In some circumstances you may be required to make payments to pay for losses. The return of this product may change depending on currency fluctuations. The total loss you may incur may be significant. This product does not include any protection from future market performance so you could incur significant losses. In the event that AIB is not able to pay out what is owed, you could incur significant losses.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.** The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily terminated early. If you terminated the product earlier than the agreed maturity date you may have to pay extra costs. Scenarios below are based on a EUR/GBP FX Option assuming a notional amount of EUR 10,000 with a strike rate equal to the 3 month forward contract rate and an expiry date of 3 months. The table shows the money you could get back or pay after costs in 3 months' time under different performance scenarios.

Recommended Holding Period: This product is designed to be held until maturity.		
Notional Amount EUR 10,000		
Scenarios		3 Month
Stress	What you might get back after costs	-EUR 277
	Average return each year*	-2.77%
Unfavourable	What you might get back after costs	-EUR 277
	Average return each year*	-2.77%
Moderate	What you might get back after costs	-EUR 277
	Average return each year*	-2.77%
Favourable	What you might get back after costs	EUR 124
	Average return each year*	+1.24%

*The potential return/loss is calculated as a percentage over the notional amount.

What happens if AIB is unable to pay out?

AIB is a member of the Irish compensation scheme established under the Investor Compensation Act 1998 (the 1998 Act). The 1998 Act provides for the establishment of a compensation scheme and payment, in certain circumstances, of compensation to certain clients (defined in the 1998 Act as eligible investors) of authorised investment firms. You may be entitled to compensation from this scheme if we are unable to meet any of our liabilities to you. Where an entitlement to compensation is established, the compensation payable will be 90% of your net loss or EUR 20,000 (whichever is the lesser).

What are the costs?

The person advising on this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The table shows the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount. The costs below may vary depending on the underlying parameters of the transactions.

We have assumed:

- The notional amount is EUR 10,000
- The product cannot be held longer than agreed maturity date so other holding periods are not applicable

	If you end after 3 months
Total Costs	EUR 140
Cost impact *	1.40%

*This illustrates the effect of costs over a holding period of less than 1 year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs. This illustrates costs in relation to the notional value of the PRIIP.

Key Information Document

Composition of costs*

One-off costs upon entry or exit		Cost Impact
Entry costs	1.40 % of the amount you pay in when entering this investment.	EUR 140
Exit costs	We do not charge an exit fee for this product.	0%
Ongoing costs [taken each year]
